Professional Summary

Recent Bachelor of Science in Computer Science graduate with a concentration in Software Engineering, passionate about leveraging technology to solve real-world problems. Demonstrated skills in AI prompt engineering, database management, and full-stack development through academic projects and internships. Hardworking, reliable, and eager to prove value by contributing to innovative teams, as evidenced by strong recommendations from industry leaders. Seeking entry-level opportunities in software development or AI to apply technical expertise and drive business efficiency.

Skills

- **Programming Languages:** C++, Java, PHP, HTML, CSS, JavaScript, Assembly
- **Databases & Tools:** MySQL, MariaDB, iOS/Android Development, UNIX
- **Core Competencies:** Software Engineering, Data Structures & Algorithms, Computer Architecture, Mobile Device Programming, AI Prompt Engineering
- **Soft Skills:** Team Collaboration, Self-Management, Intellectual Curiosity, Reliability

Professional Experience

AI Prompt Engineering Intern - AxiomPro, Remote

May 2025 – September 2025

- Developed effective AI prompts to achieve repeatable results, minimize hallucinations, and ensure quality assurance, balancing performance with cost optimization for business applications.
- Evaluated multiple AI approaches to reduce operational costs, solve daily business challenges, and enhance customer experiences, demonstrating initiative and leadership in team settings.
- Collaborated with senior developers to apply AI in process optimization, earning praise for professionalism, dependability, and technical foundation (as noted in recommendation from President & CEO).

Server Technician & IT Specialist - Integrative Primary Care & Mental Health Clinic, Chicago, IL

June 2024 – August 2024

- Built and integrated server systems across networks using MariaDB and SQL, ensuring seamless data management and system reliability.
- Troubleshoot hardware and software issues, contributing to efficient clinic operations in a fast-paced environment.

IT Specialist - Empowered Point of Sale, Waukegan, IL

May 2023 – August 2023

- Provided hardware/software support and consulted on technology strategies, aiding business decisions and enhancing system performance.
- Demonstrated reliability in resolving technical challenges, fostering a collaborative team dynamic.

Server – Ellwood Steak & Fish House, Dekalb, IL

August 2019 – May 2025

- Developed customer service skills, a strong work ethic in a fast-paced environment centralized around teamwork, and flexibility in schedule.
- Operated in 5 different areas of the restaurant beginning at bar back, then busser, server, expeditor, and as a line cook, looking to help the business succeed wherever help was needed and developing deeper industry knowledge.
- Understood the high-level communication required and developed trustworthy relationships with my managers and coworkers for a high attention to detail and delivered personalized and concise service with my repeat customers

Education

Northern Illinois University

Bachelor of Science in Computer Science, DeKalb, IL

Graduated: May 2025

GPA: 3.699

- Concentration: Software Engineering (focus on scalable applications, testing, and deployment)
- Relevant Coursework: Data Structures & Algorithms, Database Management, Computer Architecture, Operating System Principles, Mobile Device Programming Certification.

Projects

Hardware Store Management System (C++, MySQL, PHP, HTML/CSS)

- Designed a full-stack inventory system for customer tracking, order processing, and automated invoicing, improving data retrieval efficiency by an estimated 25% through optimized MySQL queries.
- Implemented a secure shopping cart with real-time inventory updates, simulating real-world e-commerce functionality.
